

# Data Literacy

## Data Literacy

**Data Literacy spans multiple capabilities. See how many your organization embraces for your data journey. Go.**

Leadership drives excellence in literacy, a necessary ingredient for any modern digital transformation. Lead on.

Chief Data Officer

Data Privacy and Security

Controls and safety minimize risks and more risks AND builds trust inside and outside your organization. Stand out.

Can't have one with out the other so tame your data and make it better, well-behaved and get it fit.

Data Quality & Governance

Metadata Management

Info about your info. Lineage, process impacts, compliance and business transparency are key. Whose your data?

Do you have good data practices? Are you asking if they have the potential to adversely impact people and society? Do good.

Data Ethics

Data Science

Are you getting everything out of your data. Have you multi-purposed any of it? Experiment with some science.

You like pictures. Seeing your data helps drive insights which drive positive action. Take a look.

Data Visualization

Business Intelligence

Manual or automated reports? Can you do better and be faster and be more accurate? Become a smart organization.

Evolution happens. Leverage it to turn your data into an asset and drive immediate impacts. See Data Science.

AI & Machine Learning

Advanced Analytics

Descriptive, predictive and prescriptive analytics to tell you what, when and why. Find some questions and let your data answer.

Bonus: Take advantage of the advanced tools in the cloud and have all of your data in one place. No more server hardware or upgrades or backups.
